## OS Commerce – PayUMoney Integration

**Step 1:** Copy the “Catalog” folder from the PayuMoney integration kit and merge it with “Catalog” folder of OSCommerce folder on your root directory (In other words, copy the end files/folders in the integration kit sent to you manually according to the files and folder structure in your OSCommerce module in your root directory).

**Step 2:** Now goto your OS Commerce Admin Panel login page. Enter the credentials –

Administrator Login

I am able to write to the configuration file: C:/wamp/www/osc/catalog/includes/configure.php. This is a potential security risk - please set the right user permissions on this file.

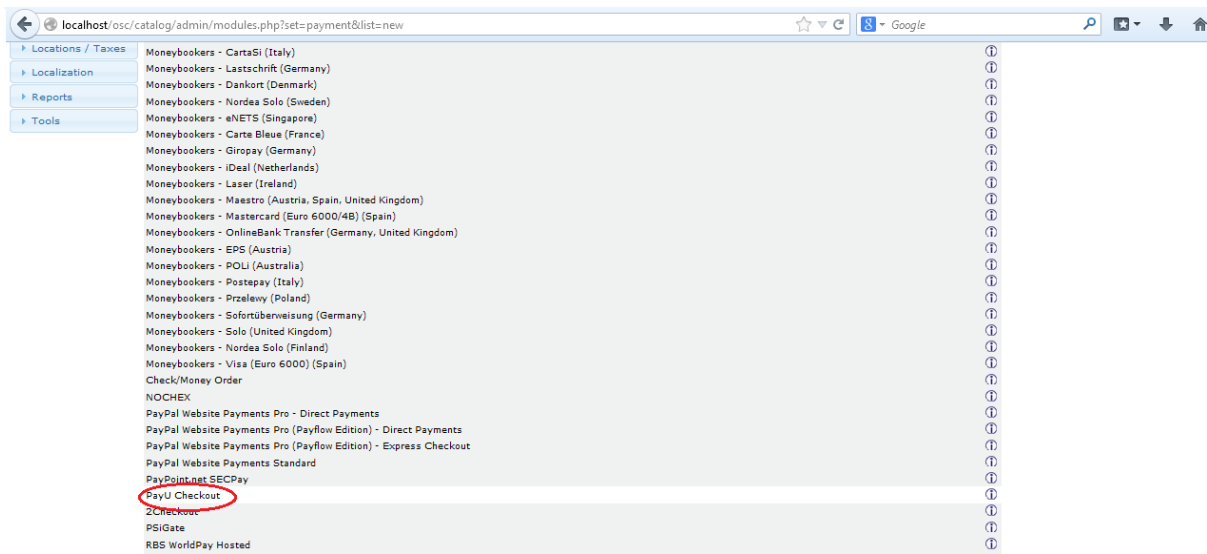

**Step 4:** Hover the mouse over “**Modules**” in the left hand side of the screen and click on “Payment”.

The screenshot shows the osCommerce Admin interface. The left sidebar has 'Modules' highlighted. The main area shows the 'Test Store' dashboard with two line graphs: 'Total Revenue' and 'Total Customers'. Below the graphs is a table of 'Last Administrator Logins' and a list of 'Recent News' items. A yellow warning box is visible in the center of the dashboard.

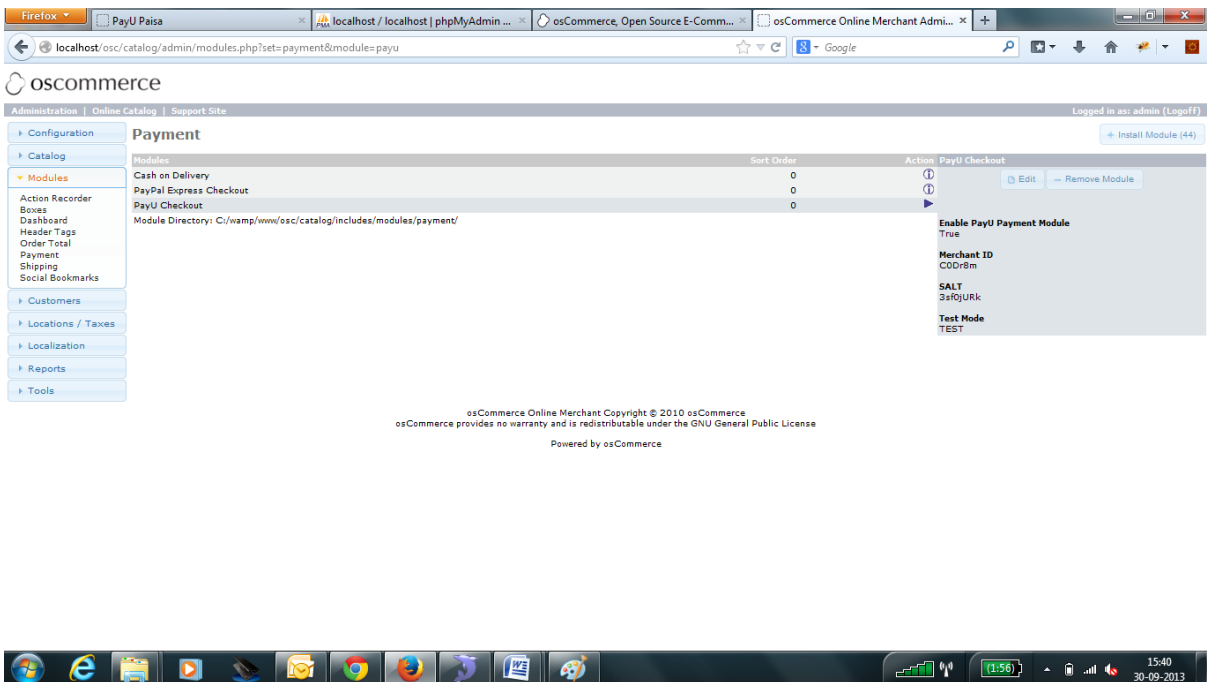

**Step 5:** You should get to the following page –

The screenshot shows the osCommerce Admin interface with the 'Payment' module configuration page. The left sidebar has 'Modules' highlighted. The main area shows a table of modules with columns for 'Module', 'Sort Order', and 'Action'. Below the table is a list of configuration options for the 'Cash on Delivery' module. A red circle highlights the 'Install Module (4/5)' button in the top right corner.

**Step 6:** Click on “Install Module” and you should get the following page –

**Step 7:** Select “PayU Checkout” and click on “Install Module” at top right hand side of the screen and you should get the following page –

**Step 8:** Click on “**Edit**” and fill the details as mentioned below –

- **If you want to use the demo -**

**Do you want to accept Payu payments?** – True
